

New Energy Development

MIDWEST OIL AND GAS DEVELOPMENT PLAN (OGDP)

LEAD WITH PASSION • OUTPERFORM EXPECTATIONS
DELIVER RESULTS RESPONSIBLY • UNLEASH OPPORTUNITIES
COMMIT TO GOOD

Good Neighbor Commitment

NOISE

We use upgraded drilling rigs with noise-reducing features and quiet hydraulic fracturing technology. These features reduce the noise from our operations.

LIGHT

We use light-emitting diode (LED) lights strategically oriented away from homes, making our operations less visible to our neighbors.

ODOR

To counteract any potential hydrocarbon odor during our drilling operations, we use low-aromatic, synthetic drilling fluid.

DUST

We work to mitigate dust by applying dust suppression to the roads as needed. Various techniques include installing tracking pads and sediment traps, hydro mulching and/or hydroseeding topsoil piles, seeding disturbed soils, and placing and compacting a gravel layer on the working pad surfaces and access roads.

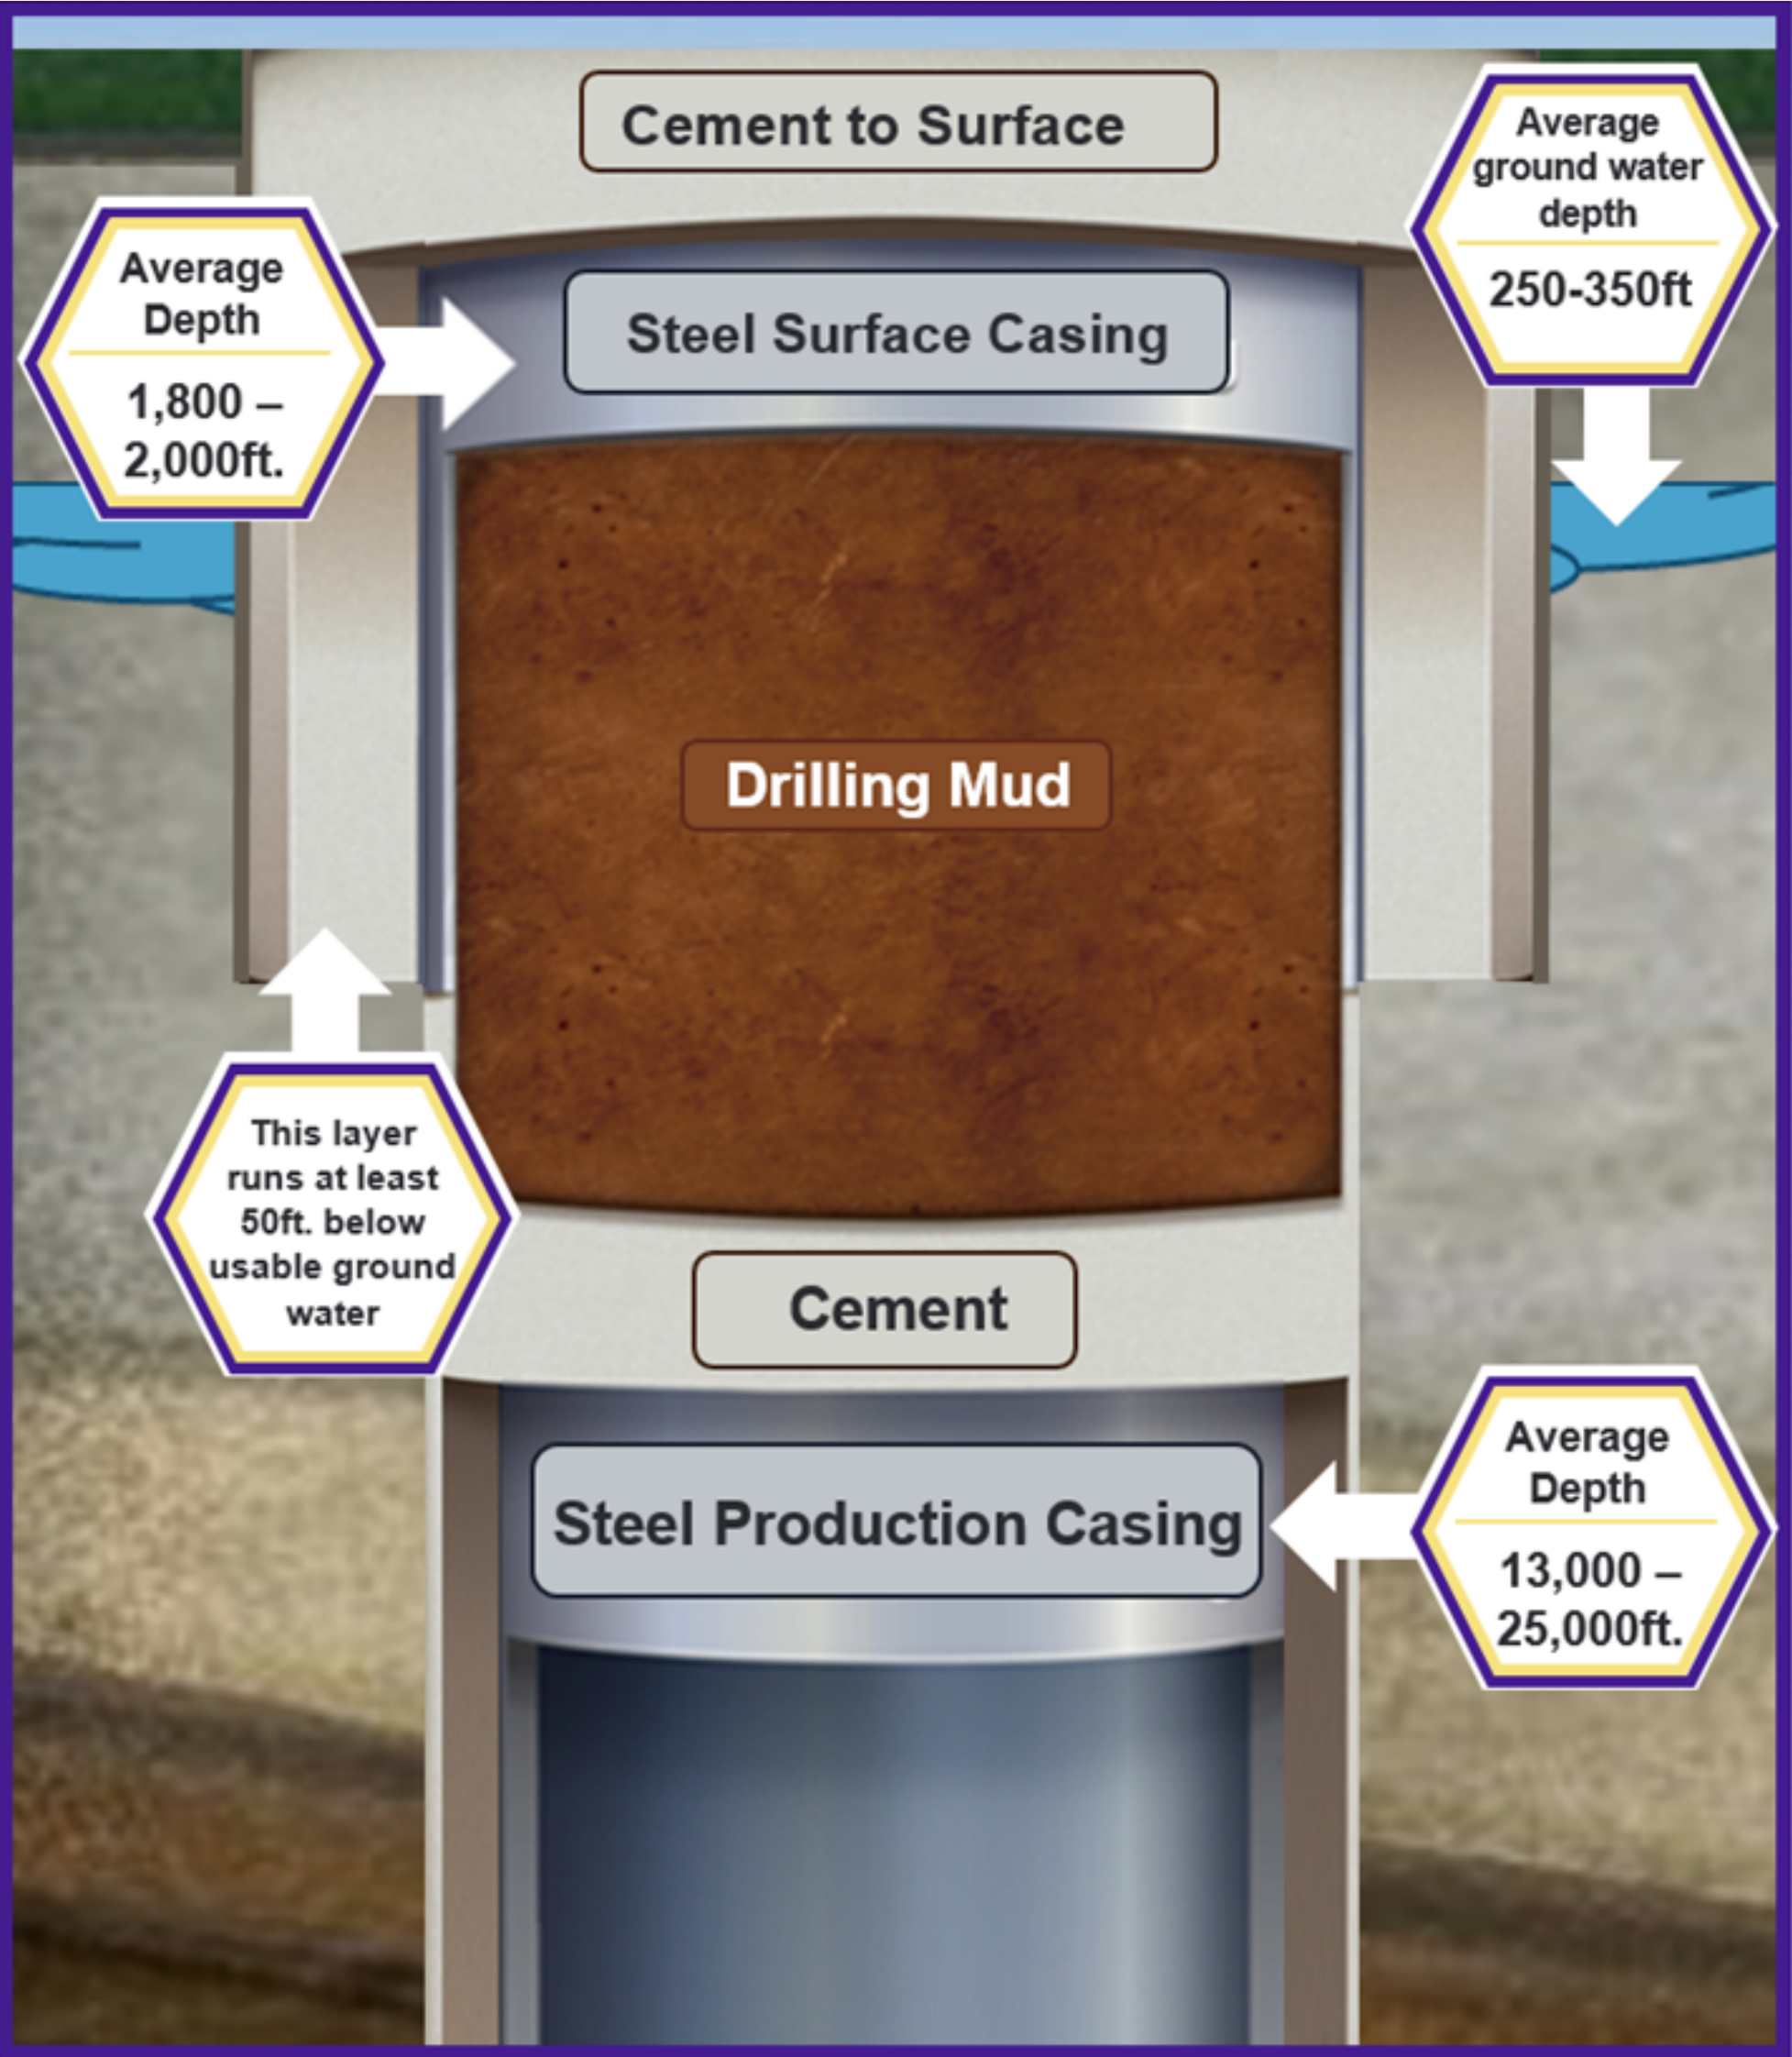

Horizontal Drilling

UNDERGROUND ACTIVITY

A production rig arrives and drills to a depth of 7,000 to 8,000 feet.

The horizontal portion of the wellbore can extend more than 2 miles.

Horizontal drilling takes approximately 4-6 days per well.

PROTECTIVE STEEL CASING

Additional layers of protective steel casing and cement are installed.

Completions

Well completions consists of hydraulic fracturing, flowback, well clean-out and tubing installation. Completions takes approximately 4-6 days per well.

Hydraulic Fracturing: A safe, highly engineered technology developed in the 1940s. Fluid is pumped over a mile below the earth's surface under pressure to create hairline fractures in the rocks.

We transport the water used in hydraulic fracturing through our innovative “Water On Demand” pipeline system.

Flowback: After fracturing, the wells are opened, and oil and gas flow into the mobile production facility.

Well clean-out and Tubing: The wells are cleaned out to remove excess sand and install the production tubing.

LEAD WITH PASSION • OUTPERFORM EXPECTATIONS

Estimated Permitting and Notice Timeline

Pre-application Community Meeting – In person

Mead Special Use Permit (SUP) Submittal

Energy and Carbon Management Commission (ECMC) Permit Submittal

Mead SUP Public Hearing

Mail ECMC Post-Completeness Notice

Ongoing outreach to area, 1 on 1 conversations with stakeholders

Post-Completeness Community Meeting – In-person

ECMC Public Comment Period

ECMC Public Hearing

WE WOULD LOVE TO HEAR FROM YOU

Please reach out to us if you have any questions or would like to provide feedback during the entire permitting process. Our team is also available during development and operations.

Your feedback is important to us

Thank you for attending the Midwest Community Meeting. Your thoughts about the proposed project are important. We look forward to learning more about your community and your preferences as we work through the permitting process.

Please scan the QR code to share feedback about the Midwest project and receive email updates. You may also fill out the survey you received at check-in.
